To print a document from an iOS app you can use AirPrint. To use this feature, you will need to be connected to the Redlands College Wi-Fi network.

1. Tap on the app's share icon, and tap the print icon. Note, not all apps support printing.
2. Tap on Select Printer.
1. Tap on Redlands AirPrint
2. If you wish to set print options, tap on Options. Note, the Staple and Punch features are not supported.
3. You can also set where to start and end printing by swiping through the document preview, and tapping on the page, then selecting from the options that appear.
4. When prompted, please supply your College username and password, then tap the OK button.
5. Your document is sent to the printer
